## Press Release

Woodbridge, ON Canada, August 13, 2009: Urban Fire Corp. announces the availability of its line of outdoor gas fireplaces for the hospitality industry. All of the fireplaces are designed approved by Mike Krieger - a renowned Canadian designer who works exclusively with stainless steel. Some of Mike Krieger's custom designs can be viewed at [www.urbanfire.ca](http://www.urbanfire.ca).

Urban Fire 2, a sleek coffee table design was a 2007 Vesta Award finalist. The gas fireplaces are CSA safety approved for outdoor use in the USA and Canada. These are dual fuel appliances that are easily converted for use with propane or natural gas.

A large selection of glass colors provides customers with numerous décor options. During the day, the fireplaces serve as functional tables for guests to use. In the evening, the true magic of the products shine, as flames dance over the sparkling glass inviting guests to relax and enjoy the outdoor spaces. On chilly evenings the heat provided by the tables will allow guests to linger beside pools or other outside entertainment areas.

Urban Fire has created numerous custom designs for clients and will work with a property's designer to provide a solution unique to the client's situation. For further information visit:
